Yield data shown is based on calculations as further explained in the Statement of Additional Information which is available upon request.

Performance data shown represents past performance and is not a guarantee of future results. Investment return and principal value will fluctuate, so you may have a gain or loss when shares are sold. Current performance may be higher or lower than that quoted.

Total returns include changes in share price and reinvestment of dividends and capital gains, if any. The tax-equivalent yield estimates what you would have to earn on a taxable investment to equal the fund's tax-exempt yield for a given tax rate.

Tax-equivalent yield examples shown above assume investors are state residents and take an itemized deduction for state income taxes on their federal tax returns.
